Burhanuddin Khatri

FAST'27| CS |Guest Relations Specialist At Procom'24
Karāchi, Sindh, Pakistan

Summary

As a computer science student at Fast University, I am passionate about learning and developing new skills in programming, especially in C language. I have obtained multiple certifications in Git and GitHub, which enable me to collaborate and manage projects effectively.

Currently, I am working as a Guest Relations Specialist at PROCOM'24, a national level programming competition that attracts hundreds of participants and sponsors every year. In this role, I am responsible for communicating and coordinating with the guests, sponsors, and organizers, ensuring a smooth and memorable experience for everyone. I also apply my C and Git skills to assist the technical team in setting up and troubleshooting the competition environment.

My goal is to innovate and create solutions that can make a positive impact on society. I am always eager to learn from others and challenge myself to grow as a programmer and a professional.
